

## Leidos to Showcase Multi-Domain Capabilities at Special Operations Conference

May 20, 2019

RESTON, Va., May 20, 2019 /PRNewswire/ -- [Leidos](#) (NYSE: LDOS), a FORTUNE® 500 science and technology leader, will showcase solutions and capabilities that enable warfighters to achieve mission success and multi-domain dominance at home and abroad during the 2019 Special Operations Forces Industry Conference May 21-23 in Tampa, Fla. The company will feature spotlight talks the first two days of the conference and capability demonstrations throughout exhibit hours in [booth #824](#).

"It's imperative our warfighters have access to innovative solutions that give them a decisive and sustained military advantage in multi domain operations," said Gerry Fasano, Leidos Defense Group President. "Leidos will demonstrate capabilities of interest to the special operations community, which deliver a much needed technical edge on their critical missions."

Leidos Spotlight talks will include:

- **Geospatial Innovation:** A presentation describing how Leidos develops geospatial data by leveraging procedural terrain generation technology to improve training through rapid and affordable access to realistic environmental representations.
- **Improve your Intelligence Workflow with Real- Time Critical Insights:** A hypothetical real-life example demonstrating how an analyst would use the company's Critical Insight application as part of the intelligence workflow.
- **Sea Hunter and Maritime Autonomous Behavior:** A look into the Leidos designed Sea Hunter demonstration vehicle and the Office of Naval Research's Medium Displacement Unmanned Surface Vessel program. The discussion will include maritime autonomy architecture, behaviors, and missions, and recent efforts in autonomous survey and autonomous logistics.
- **Tactical Decision Kit (TDK) Augmented Reality Training:** An overview of TDK, a kit that places tactical units into an immersive environment where units can train and rehearse missions through a virtual representation of the actual operational environment from mission planning, execution, and after action reporting and analysis.
- **Warfighter Optimization:** An insight into how we fully integrate longitudinal data analysis and true cross-functional/multi-discipline approaches to ensure individual, and team readiness is achieved to successfully fight and win against adversaries.

Leidos will also showcase demos that include: the Critical Insight application that uses AI automation; Veracint™ and A2M2P platform, which use data collection and analytics; ADEPT, a platform used for GPS denied navigation; the Integrated Building Interior Surveillance System, which collects through-wall radar data; Foxhound, a multi-intelligence airborne intelligence, surveillance, and radar solution; and Sea Hunter.
