

Leidos Joins Cerner, Technology And System Integration Leaders To Modernize Veterans' Electronic Health Records

October 3, 2018

RESTON, Va., Oct. 3, 2018 /PRNewswire/ -- Leidos announced today it is joining Cerner, a global leader in health care technology, and other industry leaders and innovators to help make seamless care available to the nation's veterans. This newly formed team announced by Cerner will bring extensive experience in large enterprise systems and commercial sectors to modernize the U.S. Department of Veterans Affairs (VA) electronic health record (EHR).

"As lead systems integrator for the DoD's Defense Healthcare Management Systems Modernization (DHMSM) program, we are pleased that the deployment of MHS GENESIS will now include the VA," said Jerry Hogge, senior vice president, Leidos. "We look forward to continuing our partnership with Cerner, further strengthening our joint mission to deliver an enhanced healthcare solution for both our active duty military, as well as our Veterans and their families."

In addition to Cerner, Leidos will join Guidehouse, Accenture, Henry Schein One, AbleVets LLC, MicroHealth, ProSource360 and 17 additional small businesses – many of which are veteran-owned – to form the team that will provide experience and expertise to the VA implementation.

"We are proud Leidos will be part of this important team of industry leaders that will shape the future of care for veterans through a modern EHR system," said Travis Dalton, president, Cerner Government Services. "We will work together to address the needs and capabilities that are in the best interest of the VA. Our veterans deserve the highest quality care and with this team, we look forward to bringing a modern, seamless system to those who have served our country."

In May, Cerner announced an historic agreement and VA made the program one of their top priorities to improve care for veterans. Using technology that has been deployed successfully at Department of Defense (DoD) medical facilities and thousands of provider sites globally, Cerner plans to provide seamless care across the VA's high-performing integrated network, including VA facilities, community providers and DoD facilities.

Leidos will join Cerner and other VA EHR modernization members to outline the strategy during the [Cerner Health Conference](#), Oct. 8-11, in Kansas City, Mo.
