

Leidos Puts Real-Time Training Capability in Warfighters' Hands Before They Deploy

May 14, 2018

Company Awarded \$210 Million Contract to Support Army's Synthetic Environment Program

RESTON, Va., May 14, 2018 /PRNewswire/ -- Leidos (NYSE: LDOS), a global science and technology leader, was awarded a prime contract by the U.S. Army Contracting Command – Orlando to develop and provide simulated training environments to meet the U.S. Army's operational training requirements.

Leidos' [Synthetic Environment Core \(SE Core\)](#) provides databases enabling high-resolution, realistic training environments with real-world 3D and 2D geographic terrain that fully integrates and operates within all training environments. SE Core allows warfighters to have a complete picture of the environment such as maps, roads, bridges, moving vehicles and buildings. This capability helps U.S. warfighters train as they fight in today's battlespaces before entering theaters of combat operations. SE Core content supports training, simulation and Mission Command Systems

The single award, indefinite delivery indefinite quantity, cost-plus-fixed-fee contract has a one-year base period of performance with four one-year options and a total contract value of \$210 million. Work will be performed at the Leidos facility in Orlando under the direction of the U.S. Army's Program Executive Office for Simulation, Training & Instrumentation.

Leidos has demonstrated proven performance on the SE Core program for over 10 years, developing and producing terrain databases and common cultural and moving models for use across the Army family of constructive and virtual simulations.

"Operationally relevant training requires operationally relevant data" said Mike Chagnon, Leidos Advanced Solutions Group President. "As the battlespace evolves, it's critical for our nation's warfighters to have advanced technologies that better equip, protect and train them. Leidos will continue to apply its unparalleled geospatial and training expertise to add to the 14.4 million square kilometers of simulated terrain already in use by the Army."

About Leidos

Leidos is a Fortune 500[®] information technology, engineering, and science solutions and services leader working to solve the world's toughest challenges in the defense, intelligence, homeland security, civil, and health markets. The company's 31,000 employees support vital missions for government and commercial customers. Headquartered in Reston, Virginia, Leidos reported annual revenues of approximately \$10.17 billion for the fiscal year ended December 29, 2017. For more information, visit www.Leidos.com.

Statements in this announcement, other than historical data and information, constitute forward-looking statements that involve risks and uncertainties. A number of factors could cause our actual results, performance, achievements, or industry results to be very different from the results, performance, or achievements expressed or implied by such forward-looking statements. Some of these factors include, but are not limited to, the risk factors set forth in the company's Annual Report on Form 10-K for the period ended December 29, 2017, and other such filings that Leidos makes with the SEC from time to time. Due to such uncertainties and risks, readers are cautioned not to place undue reliance on such forward-looking statements, which speak only as of the date hereof.
