

Centers for Disease Control and Prevention Award Leidos Prime Contract

November 27, 2017

Company to Provide Logistical Support, Emergency Operations and Program Coordination to the CDC Division of Strategic National Stockpiles

RESTON, Va., Nov. 27, 2017 /PRNewswire/ -- [Leidos](#) (NYSE: LDOS), a FORTUNE 500 science and information technology company, was awarded a prime contract by the Centers for Disease Control and Prevention (CDC) to provide logistical support, emergency operations, and program coordination to the Division of Strategic National Stockpiles (DSNS). The follow-on single-award time & materials contract has a one year-base period, four one-year options, and a total contract value of \$26 million.

The almost \$7 billion Strategic National Stockpile (SNS) inventory of antibiotics, medical supplies, antidotes, antitoxins, antiviral, vaccines and other pharmaceuticals requires vigilant monitoring and management to keep stock supplied, rotated, and stored within U.S. Food and Drug Administration potency shelf-life requirements. DSNS requires support for rapid, agile delivery of stockpile material when a national emergency occurs —anywhere, anytime—within the United States or its territories

Through a 15-year partnership with the CDC on this program, Leidos has developed a well-honed understanding of the DSNS mission to protect the nation's health through responsive key personnel with demonstrated performance, and an ability to adapt and adjust to challenge and priorities. Under the task order, Leidos will continue to augment the DSNS mission by providing trained key personnel with the necessary expertise to provide logistical, technical, operational, and administrative support to assist in operating and maintaining the SNS inventory.

"We look forward to providing the expertise and key personnel necessary to sustain continual improvement to realize goals in logistics, efficiency, and cost reduction strategies that will ultimately allow the DSNS to achieve its mission to be the nation's premier medical materiel preparedness and response organization," said Leidos Group President Jon Scholl.

About Leidos
