

QTC Provides Real-World STEM Training for University Students

July 11, 2017

Company is working with California State University, Los Angeles engineering students in Professional Practice Program

DIAMOND BAR, Calif., July 11, 2017 /PRNewswire/ -- [QTC Management](#), a [Leidos](#) company (NYSE: LDOS), is fostering science, technology, engineering and math (STEM) education at California State University, Los Angeles (CSULA) through its support of the school's Professional Practice Program and Senior Design Project. This is the fourth year, QTC, a wholly-owned subsidiary of Leidos, has been participating in these programs at Cal State LA's College of Engineering, Computer Science, and Technology (ECST).

The Senior Design Project offers a capstone experience to students that enables them to apply their theoretical knowledge to real world industry problems. In this project, QTC provided guidance and project scope to build a Configuration Management Database (CMDB) for the organization's internal use. The CMDB is able to manage the servers' hardware information, the web service running on the servers and the dependence information between servers. Students worked throughout the year with QTC to build this system, which is in production for release.

"We are excited to work with such bright talent to solve these real-world engineering challenges," said Nader Nemati, Chief Information Officer of QTC. "We see the importance of encouraging, nurturing and developing the next generation of STEM professionals, who will be leading these fields in the future."

Said Dr. Emily Allen, Dean of ECST, "Our industry partners in the Professional Practice Program ensure that our students cap off their degrees with real-world engineering project experience, and are ready to hit the ground running for their employers after graduation."

About QTC Management

QTC Management, Inc., acquired by Leidos in 2016, partners with each customer to identify existing and forecasted program needs and delivers a full complement of disability-focused medical examination and diagnostic testing services. Since 2000, QTC has provided more than 4.5 million physical examinations and diagnostic tests.

About Leidos

Leidos is a FORTUNE 500® science and technology solutions and services leader working to solve the world's toughest challenges in the defense, intelligence, homeland security, civil, and health markets. The company's 32,000 employees support vital missions for government and commercial customers. Headquartered in Reston, Virginia, Leidos reported annual revenues of approximately \$7.04 billion for the fiscal year ended December 30, 2016. For more information, visit www.Leidos.com.

Statements in this announcement, other than historical data and information, constitute forward-looking statements that involve risks and uncertainties. A number of factors could cause our actual results, performance, achievements, or industry results to be very different from the results, performance, or achievements expressed or implied by such forward-looking statements. Some of these factors include, but are not limited to, the risk factors set forth in the company's Annual Report on Form 10-K for the period ended December 30, 2016, and other such filings that Leidos makes with the SEC from time to time. Due to such uncertainties and risks, readers are cautioned not to place undue reliance on such forward-looking statements, which speak only as of the date hereof.
