

Naval Surface Warfare Center Carderock Division Awards Leidos Prime Contract

June 12, 2017

Company to Continue to Provide Technical Services for Navy and Marine Signature Silencing Programs

RESTON, Va., June 12, 2017 /PRNewswire/ -- [Leidos](#) (NYSE: LDOS), a global science and technology company, was awarded a prime contract by the Naval Surface Warfare Center Carderock Division (NSWCCD) to provide operational support to NSWCCD acoustic trials and research activities for the Navy's Southeast Alaska Acoustic Measurement Facility (SEAFAC). The single-award cost-plus fixed-fee contract has a six-month base period of performance, one three-month option, and a total contract value of approximately \$12 million if the option is exercised. Work will be performed in Ketchikan, AK, Poulsbo, WA, and Long Beach, MS.

NSWCCD provides support for technical products over a wide range of scientific areas related to surface and undersea platforms including maritime science and technology. As the Navy's primary acoustic engineering measurement facility in the Pacific, SEAFAC provides the capability to perform evaluations to determine the sources of radiated acoustic noise, to assess vulnerability, and to develop quieting measures.

Leidos has supported SEAFAC for more than 20 years, including designing, operating, maintaining, and upgrading SEAFAC and its infrastructure under the SEAPORT-e contract vehicle. Under the contract, Leidos will continue to provide logistics, operations, and maintenance services in support of Navy and Marine signature silencing programs. Operational support will include vessel transport services, infrastructure inspection and maintenance, waste management service, environmental compliance support, material/weight handling equipment support, logistics, and maintenance of building mechanical systems throughout the SEAFAC site.

"SEAFAC is among the Navy's most capable undersea ranges requiring highly accurate technical performance from supporting systems. Leidos' innovative solutions enable SEAFAC to maintain a technological advantage in undersea systems to help the Navy remain in a high state of readiness for all acoustic trials," said Leidos Group President Mike Chagnon.

About Leidos

Leidos is a global science and technology solutions and services leader working to solve the world's toughest challenges in the defense, intelligence, homeland security, civil, and health markets. The company's 32,000 employees support vital missions for government and commercial customers. Headquartered in Reston, Virginia, Leidos reported annual revenues of approximately \$7.04 billion for the fiscal year ended December 30, 2016. For more information, visit www.Leidos.com.

Statements in this announcement, other than historical data and information, constitute forward-looking statements that involve risks and uncertainties. A number of factors could cause our actual results, performance, achievements, or industry results to be very different from the results, performance, or achievements expressed or implied by such forward-looking statements. Some of these factors include, but are not limited to, the risk factors set forth in the company's Annual Report on Form 10-K for the period ended December 30, 2016, and other such filings that Leidos makes with the SEC from time to time. Due to such uncertainties and risks, readers are cautioned not to place undue reliance on such forward-looking statements, which speak only as of the date hereof.
