

LEIDOS AND QUORUM ANALYTICS ANNOUNCE STRATEGIC ALLIANCE

January 9, 2017

(Reston, Va.) January 9, 2017 – Leidos Digital Solutions Inc. and Quorum Analytics, Inc today announced a new strategic alliance. As part of an exclusive reseller agreement, Leidos will now sell Quorum Analytics to elected officials at the federal, state, and local levels. The partnership will combine Leidos' extensive experience serving Congressional offices with Quorum's next generation legislative and dialogue tracking software.

Leidos Digital Solutions, a wholly owned subsidiary of Leidos, is a leading provider of innovative IT solutions to elected officials and government offices throughout the U.S., including their flagship constituent relationship management (CRM) solution, IQ. IQ is the choice of over 60 percent of the U.S. Congress and 40 percent of all U.S. Governors as well as federal, state and local government bodies from across the country. This new partnership will provide increased exposure and the opportunity for Quorum to be used by more elected officials across the country, as well as for Leidos to expand its portfolio of advanced technology solutions.

"What is really important to understand here is that data analytics make government organizations stronger. It helps us make better and more effective decisions," said Angie Heise, president of Civil Group at Leidos. "Together Quorum Analytics and Leidos are enabling our customers – offering new ways of viewing data, helping them find common ground and promoting collaboration in both legislative and executive branches of government."

We're thrilled to work with the Leidos team," said Alex Wirth, cofounder of Quorum. "Quorum will continue to provide elected officials access to the most comprehensive database of legislative information. With a new Congress and several state legislative sessions right around the corner, the timing of this partnership couldn't be more exciting."

The reseller agreement primarily applies to offices of elected government officials. Quorum will continue to sell directly to all other markets and industries while Leidos Digital Solutions remains focused on its core mission to serve elected officials as well as federal, state and local government bodies.

###

About Quorum

Quorum enables anyone to influence the legislative process with modern tracking, targeting, and outreach tools. The online platform tracks legislation and dialogue in Washington and all 50 states, leverages quantitative analytics to help users identify potential champions, and enables advocates to easily contact legislators and their staff.
