

U.S. Army Awards Leidos Medical Research Contract

August 17, 2015

Solutions Company to Provide Medical Product Research and Development to the U.S. Army Medical Materiel Development Activity

RESTON, Va., Aug. 17, 2015 /PRNewswire/ -- [Leidos](#) (NYSE: LDOS), a health, national security, and engineering solutions company, was awarded a prime contract by the U.S. Army to provide medical product and research development to the U.S. Army Medical Research and Materiel Command (USAMRMC). The multiple-award indefinite-delivery/indefinite-quantity contract has a five-year base period of performance, five-one year options, and a total contract value of \$900 million for all awardees, if all options are exercised. Leidos is one of four contractors eligible to compete for task orders under the contract. Work will be performed primarily in Frederick, Md.

The USAMRMC develops, acquires, provides, and sustains world-class solutions and capabilities to enable medical readiness globally. Under the contract, Leidos Life Sciences will provide medical product research and development services to support the missions of the U.S. Army Medical Materiel Development Activity, U.S. Army Medical Materiel Agency, other subordinate commands of the U.S. Army Medical Research and Materiel Command, Joint Project Manager Medical Countermeasure Systems, and other Department of Defense (DoD) entities responsible for medical product research and development. Work under the contract is intended to support the entire scope of developing new drugs, vaccines, blood products, medical devices, and medical support equipment that enhances readiness, ensures the provision of the highest quality medical and preventive care to the DoD, and maximizes survival of medical casualties on the battlefield.

"Our Life Sciences team located in Frederick, Maryland, led by Dr. Jim Pannucci, has proudly supported the U.S. Army Medical Research and Materiel Command for more than 33 years," said Jerry Hogge, deputy group president of Leidos Federal Health. "Our distinguished scientists and researchers look forward to providing research and development for medical products to deliver solutions that can help save and improve the lives of our military service members."

About Leidos

Leidos is a science and technology solutions leader working to address some of the world's toughest challenges in national security, health and engineering. The Company's 19,000 employees support vital missions for government and the commercial sector, develop innovative solutions to drive better outcomes and defend our digital and physical infrastructure from 'new world' threats. Headquartered in Reston, Virginia, Leidos reported annual revenues of approximately \$5.06 billion for its fiscal year ended January 30, 2015. For more information, visit www.Leidos.com.

Statements in this announcement, other than historical data and information, constitute forward-looking statements that involve risks and uncertainties. A number of factors could cause our actual results, performance, achievements, or industry results to be very different from the results, performance, or achievements expressed or implied by such forward-looking statements. Some of these factors include, but are not limited to, the risk factors set forth in the company's Annual Report on Form 10-K for the period ended January 30, 2015, and other such filings that Leidos makes with the SEC from time to time. Due to such uncertainties and risks, readers are cautioned not to place undue reliance on such forward-looking statements, which speak only as of the date hereof.
