

Leidos Supports Naval Academy Center for Cyber Security Studies Lecture Series

August 4, 2015

Donation furthers cybersecurity education

(Reston, Va.) August 4, 2015 — The U.S. Naval Academy Foundation received a gift from [Leidos](#) [NYSE: LDOS], a national security, health and engineering solutions company, to support the [Naval Academy's Center for Cyber Security Studies](#) 2015 Fall Cyber Lecture series.

The gift supports the center's series of three to five lectures throughout the academic year, which are open to the Brigade of Midshipmen, government employees and a limited number of guests. These events are a critical component of the Academy's efforts to become a national leader in cyber security education—a vital objective in a global environment where cyber security and cyber warfare have emerged as key mission areas for the Navy and Marine Corps.

"It is a widely held belief that our next war will begin not on land, sea or in the air, but in the networks that tie so many of our information, financial and defense systems together. Our Navy and Marine Corps officers must be prepared to fight and win in this new theater," said John Rudder '78, senior director of development at the Naval Academy Foundation. "Growing the Center for Cyber Security Studies is essential to the Academy's pursuit of its mission. The Center's lecture series brings national and global leaders in cyber expertise to the Yard, greatly enhancing the Brigade's understanding of these topics and enriching the dialogue on these issues within the Academy community and beyond. We are grateful for Leidos's support of this important endeavor."

The Center for Cyber Security Studies (CCCS) strives to educate all midshipmen in areas of cyber defense and warfare, facilitate the sharing of cyber expertise and perspectives, provide a streamlined means of identifying priorities, enhance interdisciplinary cyber research, disseminate information, harmonize efforts and shape a common framework for cyber-related efforts.

"Leidos is excited to expand our longtime support to the US Naval Academy. We look forward to working with the Center for Cyber Security Studies to further advance their world-class education and efforts to address the evolving cyber security challenges facing our nation today," said Charlie Kanewske '80, DoD Healthcare Management System Modernization (DHMSM) Program Director at Leidos.

The U.S. Naval Academy Foundation supports, promotes and advances the mission of the Naval Academy by working in conjunction with Academy leadership to identify strategic institutional priorities and by raising, managing and disbursing private gift funds that provide a margin of excellence in support of the nation's premier leadership institution.

About Leidos

Leidos is a science and technology solutions leader working to address some of the world's toughest challenges in national security, health and engineering. The Company's 19,000 employees support vital missions for government and the commercial sector, develop innovative solutions to drive better outcomes and defend our digital and physical infrastructure from 'new world' threats. Headquartered in Reston, Virginia, Leidos reported annual revenues of approximately \$5.06 billion for its fiscal year ended January 30, 2015. For more information, visit www.Leidos.com.

Statements in this announcement, other than historical data and information, constitute forward-looking statements that involve risks and uncertainties. A number of factors could cause our actual results, performance, achievements, or industry results to be very different from the results, performance, or achievements expressed or implied by such forward-looking statements. Some of these factors include, but are not limited to, the risk factors set forth in the company's Annual Report on Form 10-K for the period ended January 30, 2015, and other such filings that Leidos makes with the SEC from time to time. Due to such uncertainties and risks, readers are cautioned not to place undue reliance on such forward-looking statements, which speak only as of the date hereof.
