

## Leidos Awarded \$44 Million Contract by the Centers for Disease Control and Prevention

July 30, 2014

### Company to Provide Development, Support and Maintenance of the National Healthcare Safety Network

RESTON, Va., July 30, 2014 /PRNewswire/ -- [Leidos](#) (NYSE: LDOS), a national security, health and engineering solutions company, was awarded a prime task order by the Centers for Disease Control and Prevention (CDC) to provide development, support and maintenance of the National Healthcare Safety Network (NHSN). The single-award time and materials task order has a one-year base period of performance, four one-year options and a total contract value of approximately \$44 million if all options are exercised. Work will be performed in Atlanta, Ga.

The NHSN is the nation's most widely used healthcare-associated infection (HAI) tracking system, providing facilities, states, regions and the nation with data needed to identify problem areas, measure progress of prevention efforts and ultimately eliminate HAIs. Under the task order, Leidos will provide development, support and maintenance of NHSN, including: testing, maintenance and development of the application; level one user support; technical architecture and design; electronic messaging processing and support; and development, deployments, system documentation and all other deliverables consistent with the CDC Enterprise Project Life Cycle guidelines.

"The CDC's efforts with the National Healthcare Safety Network are a priority for the nation, and we are proud to continue our support in building a healthcare surveillance system that enables public health officials across the country to make more informed decisions and improve health outcomes for our citizens," said President of Leidos Health Steve Comber.

#### **About Leidos Health**

As a leader for more than 25 years in the healthcare industry, Leidos Health fuses some of the world's most advanced technologies with the brightest minds in science, research and consulting. Today, Leidos Health is focused on developing next-generation solutions in areas such as biomedical research, public health and health analytics to turn data into actionable information for clinicians and their patients. From leading groundbreaking medical research to fighting diseases such as cancer, AIDS and malaria, to implementing and optimizing electronic health records that enhance the research process and improve critical efficiencies – Leidos Health's passion to improve patient care and reduce costs is helping to transform healthcare.
