

## Leidos Awarded Contract By Wichita Airport Authority

July 9, 2014

### Company to Install and Integrate IT/Communications Systems for New Airport Terminal Area

RESTON, Va., July 9, 2014 /PRNewswire/ -- [Leidos](#) (NYSE: LDOS), a national security, health, and engineering solutions company, was awarded a prime contract by the Wichita Airport Authority to install and integrate IT/communications systems for the new airport terminal at Wichita Mid-Continent Airport, now known as the Dwight D. Eisenhower National Airport. The single-award firm, fixed-price (FFP) contract has a 10-month period of performance and a total contract value of approximately \$10 million. Work will be performed in Wichita, Kan.

Under the contract, Leidos will design, procure, install, and integrate network security, electronic visual information display, voice/data networks, and security networks for the new terminal, multiple existing buildings, new parking garage, and new rental car facility.

Wichita has historically been at the lead of the aircraft manufacturing industry with more aircraft being built in Wichita than anywhere else on earth. Mid-Continent Airport, the largest airport in Kansas, is a small hub air carrier and general aviation complex, providing accommodations for all aircraft, as well as the latest innovations in passenger convenience, safety, and efficiency. This new terminal will provide the air carriers with a facility that is designed with modern airline operational and security practices being accommodated. It will also be more efficient and customer-

friendly than the current terminal, and as a result, will allow the airlines to provide better service to their passengers.

"Leidos is an industry leader in integrating complex security and high-technology systems into critical infrastructure facilities such as airports," said Leidos Engineering Solutions Group President James R. Moos. "We're proud to support the Wichita Airport Authority by helping minimize redundancies, economize installations, and maximize functionality of the new terminal."

#### **About Leidos**

Leidos is a FORTUNE 500® science and technology solutions leader working to address some of the world's toughest challenges in national security, health and engineering. The Company's 22,000 employees support vital missions for our government and the commercial sector, develop innovative solutions to drive better outcomes, and defend our Nation's digital and physical infrastructure from 'new world' threats. Headquartered in Reston, Va., Leidos reported annual revenues of approximately \$5.77 billion for its fiscal year ended January 31, 2014, after giving effect to the spin-off of the company's technical services and information technology business.
