

SAIC Awarded Contract by Environmental Protection Agency Climate Change Division

January 5, 2012

Company to Provide Technical and Outreach Services for the Development and Implementation of the Greenhouse Gas Reporting Program

MCLEAN, Va., Jan. 5, 2012 /PRNewswire via COMTEX/ --Science Applications International Corporation (SAIC) [NYSE: SAI] announced today it was awarded a prime contract by the U.S. Environmental Protection Agency (EPA), Climate Change Division (CCD) to provide technical and outreach services for the development and implementation of the Greenhouse Gas Reporting Program (GHGRP). The Fixed Rates for Services multi award IDIQ contract has a one-year base period of performance, four one-year options, and a contract ceiling value of more than \$139 million if all options are exercised. Work will be performed in Washington, D.C.

The GHGRP is the result of an EPA mandate to report greenhouse gas (GHG) data and other relevant information from large sources and suppliers in the U.S. with the purpose of collecting accurate and timely GHG data to inform future policy decisions. Under the contract, SAIC will provide technical and outreach services for the development and implementation of the GHGRP, including technical and engineering analyses support, outreach, communications and training support, data systems and information technology support, data analytics, and publications support.

"The SAIC team looks forward to working with the EPA to develop and implement the Greenhouse Gas Reporting Program to identify sources of greenhouse gas emissions and cost effectively track, report and reduce these emissions," said JT Grumski, SAIC senior vice president and business unit general manager. "Our expertise in information technology systems development and integration, greenhouse gas accounting and policy expertise, and on-the-ground industrial process knowledge will enable us to provide the EPA with a credible repository of emissions data while minimizing costs to the regulated community."

About SAIC
