

SAIC Awarded Contract by U.S. Army Information Systems Engineering Command

September 15, 2011

Company to Provide Information Systems Engineering and Information Technology (IT) Support Services

MCLEAN, Va., Sept. 15, 2011 /PRNewswire via COMTEX/ --

Science Applications International Corporation (SAIC) (NYSE: SAI) announced today it was awarded a prime contract by the U.S. Army Information Systems Engineering Command (ISEC) to provide information systems engineering and information technology (IT) services in support of the United States Army Information Systems Engineering Command (USAISEC) and federal agency communication systems worldwide. The multiple award, indefinite-delivery/indefinite-quantity (IDIQ) contract has a five year period of performance with a total contract ceiling value of \$892 million.

ISEC carries out important roles in the Army's information mission area, with major functions including engineering, installing, quality assurance and testing for the diverse communications and automation systems throughout the Army. Under the contract, SAIC will provide information systems engineering and IT services as required, including full life cycle planning, design, development, engineering, implementation, procurement, logistics, evaluation, test, sustainment, and ancillary services for all ISEC projects. SAIC is one of three contractors that will compete for task orders under the contract.

"We look forward to providing innovative and flexible technologies to support ISEC's engineering and technical requirements around the world," said Peter Dube, SAIC senior vice president and business unit general manager.

About SAIC

SAIC is a FORTUNE 500® scientific, engineering, and technology applications company that uses its deep domain knowledge to solve problems of vital importance to the nation and the world, in national security, energy and the environment, critical infrastructure, and health.
