

SAIC Signs Master Agreement with Royal Caribbean Cruises Ltd. for IT Outsourcing

June 19, 2003

(ORLANDO) - SAIC today announced the signing of a master agreement for information technology (IT) outsourcing with Royal Caribbean Cruises Ltd. (NYSE, OSE: RCL). The agreement will enable Royal Caribbean to assign a variety of IT outsourcing work to SAIC on an expedited basis.

Since March 2003, SAIC has signed contracts with Royal Caribbean, including work to build a new enterprise-wide integrated development environment, and rebuild the Royal Caribbean corporate Web site for deployment later this year. Work is expected to be completed on these two projects by 2004. Discussions also are underway for additional future work.

"In the current economic environment, it is nice to find a large systems integrator that can provide exceptional staff and services at reasonable prices," said Nick Pietrocarlo, program manager for Royal Caribbean Cruises Ltd. "SAIC has done an excellent job, quickly adapting to the uniqueness of our enterprise and systems, while exceeding our expectations consistently along the way."

"We are very pleased to be doing this work for Royal Caribbean," said Beverly J. Kitaoka, SAIC senior vice president and manager of the Applied Software Systems Engineering Technology (ASSET) Group, which is based in Orlando. "SAIC's highly evolved and productive software processes will enable Royal Caribbean to focus on its core business, while relying on us to solve their IT challenges quickly and efficiently."

Royal Caribbean Cruises Ltd. is a global cruise vacation company that operates Royal Caribbean International and Celebrity Cruises, with a combined total of 25 ships in service and three under construction. The company also offers unique land-tour vacations in Alaska, Canada and Europe through its cruise-tour division.
