

SAIC Awarded \$35 Million Task Order by Naval Surface Warfare Center Crane Division

July 29, 2010

Company to Continue Technical and Training Support for NSWC Crane's Joint Forces Training and Support Branch

MCLEAN, Va., July 29, 2010 /PRNewswire via COMTEX/ --

Science Applications International Corporation (SAIC) (NYSE: SAI) today announced it has been awarded a task order by the Naval Surface Warfare Center (NSWC) - Crane Division to provide technical, training and armory management support to the military services and other law enforcement agencies. The task order has a two-year base period of performance, three one-year award term periods, and a total value of more than \$35 million, if all award term periods are exercised. Work will be performed at NSWC Crane in Crane, Ind. and other locations as required. The task order was awarded under the U.S. Navy's SeaPort-e contract.

NSWC Crane is a field activity of Naval Sea Systems Command (NAVSEA) with focus areas in strategic and special missions, and electronic warfare/information operations. The division maintains a full spectrum of research, development, acquisition support, and test and evaluation capabilities for the Department of Defense. Under the task order, SAIC will continue to support NSWC Crane's Joint Forces Training and Support Branch by providing a wide range of classroom training, logistics documentation, technical manual update, and software update support for training equipment related to systems such as small arms weapons, ground based operational surveillance, and night vision devices. SAIC will also develop a computer-based training system for use in NSWC - Crane's E-Learning environment.

"We look forward to continuing our support of NSWC Crane's growing training mission by helping equip military personnel with the advanced skills training and technical support required to perform their critical missions," said Tom Baybrook, SAIC senior vice president and business unit manager.

About SAIC

SAIC is a FORTUNE 500(R) scientific, engineering, and technology applications company that uses its deep domain knowledge to solve problems of vital importance to the nation and the world, in national security, energy and the environment, critical infrastructure, and health. The company's approximately 45,000 employees serve customers in the U.S. Department of Defense, the intelligence community, the U.S. Department of Homeland Security, other U.S. Government civil agencies and selected commercial markets. Headquartered in McLean, Va., SAIC had annual revenues of \$10.1 billion for its fiscal year ended January 31, 2009. For more information, visit <http://www.saic.com/>.
