

## **SAIC Announces Key Organizational Changes**

November 28, 2005

(SAN DIEGO) - Science Applications International Corporation (SAIC) today announced two organizational changes to its corporate leadership team.

"I am pleased to announce two key organizational changes that will further strengthen our corporate leadership team," said Ken Dahlberg, SAIC chairman and chief executive officer. "After five years as chief financial officer (CFO) of our company, Tom Darcy will assume the new position of executive vice president, Strategic Projects.

"In this capacity Tom will be responsible for several strategic imperatives as we plan and execute our transition to a public company early next year. Tom's initial role will be to facilitate an efficient transition of chief financial officer responsibilities to his successor, provide additional financial expertise during the implementation of our initial public offering, and assist in the establishment of our investor relations function. Tom will continue to report directly to me. I want to thank Tom for his personal contributions, teamwork and support to me as CFO and I look forward to his continued participation as a member of our senior management team.

"I am also very pleased to announce that effective today, Mark Sopp will become executive vice president and chief financial officer of our company reporting directly to me. Mark joins SAIC with more than 18 years of finance experience, after most recently serving as CFO and treasurer of The Titan Corporation. At Titan, Mark helped manage the organization through a period of dramatic revenue growth from \$400 million to \$2.5 billion over a five-year period. In an environment complicated by vigorous acquisition activity, Mark and his team also achieved a successful SOX 404 certification. Mark practiced as a certified public accountant early in his career after earning a Bachelor of Accountancy degree from New Mexico State University.

"This is an exciting opportunity with a corporation I have long admired and I look forward to working with Ken and the leadership team at this point in SAIC's highly successful history," said Sopp.

SAIC is the largest employee-owned research and engineering company in the United States, with annual revenues of \$7.2 billion and more than 43,000 employees in over 150 cities worldwide. SAIC engineers and scientists solve complex technical problems in national security, homeland security, energy, the environment, space, telecommunications, health care, and logistics.
