

SAIC Awarded Homeland Security Preparedness Technical Assistance Contract

May 18, 2005

(MCLEAN, VA) – Science Applications International Corporation's (SAIC) Integrated Security and Systems Solutions (ISSS) Business Unit has been selected to provide professional consulting services for the U.S. Department of Homeland Security, Office of State and Local Government Coordination and Preparedness (SLGCP), Office for Domestic Preparedness (ODP). The technical assistance contract will enhance state and local critical infrastructure preparedness to prevent, respond and recover from terrorism incidents.

The single award is for a period of performance of one base year plus two option years for a potential cumulative value near \$20 million. One of the primary objectives of this contract is to enhance the ability of state and local governments, as well as port authorities and mass transit agencies, to develop, plan and implement effective strategies for weapons of mass destruction (WMD) preparedness. Specifically, the Port/Mass Transit Technical Assistance program requires the application of a methodology developed by SAIC to compare relative risk between critical assets in order to identify and prioritize needs in terms of security countermeasures, as well as response and recovery capability enhancements.

"SAIC has supported ODP since its inception in 1998, by providing technical assistance to improve the ability of state, local and special needs jurisdictions to deter, prevent, respond and recover from acts of WMD terrorism," said Phil Lacombe, senior vice president and general manager of the ISSS Business Unit. "SAIC security, risk and emergency response and recovery specialists will combine their knowledge of the WMD terrorism response domain with their understanding of the needs of emergency responders to develop effective preparedness and response strategies compliant with Homeland Security Presidential Directive-8, National Preparedness."

SAIC's team will be led by Phil Lacombe's ISSS Business Unit, with support from Jim Cuff's Logistics and Engineering Solutions (LES) Business Unit and Ray Johnson's Advanced Concepts Business Unit.

SAIC's team members for this contract include Parsons Brinckerhoff Quade & Douglas, Inc., Herndon, Va.; Digital Sandbox, Inc., Herndon, Va.; The Lafayette Group, Vienna, Va.; Transportation Resource Associates, Philadelphia, Pa.; and MILVETS Systems Technology, Inc., Lanham, Md.
