

SAIC Recognized by Department of Justice for Outstanding Small Business Performance

July 14, 2006

(SAN DIEGO and MCLEAN, VA) - Science Applications International Corporation (SAIC) today announced that the U.S. Department of Justice (DOJ) has recognized SAIC for its small business subcontracting accomplishments and support of small businesses for Government Fiscal Year 2005 (GFY05). During that year, SAIC subcontracted in excess of \$46 million to small businesses under DOJ contracts, a figure that represents more than 90 percent of all the funds spent by SAIC on subcontractors for its DOJ prime contracts.

"These awards recognize our commitment to working with small businesses in order to effectively support the Department's mission to protect and defend the interests of the United States," said Phil Lacombe, SAIC senior vice president and general manager of the Integrated Security and Systems Solutions Business Unit. "Small businesses have been able to bring skill and innovation that enable SAIC to support the Department in its fight against crime and terrorism while fostering economic growth."

SAIC offers a full spectrum of integrated security solutions and provides deep business expertise in the areas of converged security services, cybersecurity, physical security, secure e-government, public safety wireless communications, emergency preparedness and response, case and lab management and secure collaboration. SAIC recognizes the important contributions made by small businesses and strives to foster strategic relationships with small businesses in order to create solutions that help solve complex problems for our nation.

SAIC is the largest employee-owned research and engineering company in the United States, with more than 43,000 employees in over 150 cities worldwide. For the fiscal year ended January 31, 2006, the company reported annual revenues of \$7.8 billion. SAIC engineers and scientists solve complex technical problems in national security, homeland security, energy, the environment, space, telecommunications, health care, and logistics.
