

SAIC Wins IRS Contract to Support Infrastructure Strategy and Investment Planning Program

October 22, 2007

SAN DIEGO and MCLEAN, Va., Oct 22, 2007 /PRNewswire-FirstCall via COMTEX News Network/ -- Science Applications International Corporation (NYSE: SAI) today announced that it has been awarded a task order contract to support the Infrastructure Strategy and Investment Planning (ISIP) program at the U.S. Internal Revenue Service (IRS).

The new single-award, cost-plus-fixed-fee contract has a one-year base period of performance, three one-year options and one, one-month option. The ceiling value of the contract is \$26 million if all options are exercised.

The IRS infrastructure vision will define the plan for the next three to five years and help implement high-quality information technology (IT) to enhance and modernize the infrastructure as a strategic investment. The scope of the three- to five-year infrastructure vision and roadmap covers the breadth of technologies, systems, and services identified by the IRS infrastructure taxonomy including security services; systems management; platforms and platform services; communications services; and physical infrastructure. The task order builds on current IRS infrastructure strategies and initiatives by identifying new opportunities for infrastructure improvements. After the initial vision and planning work, the team will support projects identified in the roadmap.

"SAIC is pleased to continue more than a decade of support for the Department of Treasury and specifically, the IRS. We look forward to providing the IRS with industry best practices along with SAIC's breadth of experience within the federal, civilian, and commercial marketplace," said Randy Cash, SAIC senior vice president and business unit general manager. "This type of consulting and thought leadership work is one of our core capabilities and complements our other traditional IT offerings such as data management, software development and infrastructure operations."

SAIC is a leading provider of scientific, engineering, systems integration and technical services and solutions to all branches of the U.S. military, agencies of the Department of Defense, the intelligence community, the U.S. Department of Homeland Security and other U.S. Government civil agencies, as well as to customers in selected commercial markets. With more than 44,000 employees in over 150 cities worldwide, SAIC engineers and scientists solve complex technical challenges requiring innovative solutions for customers' mission-critical functions. SAIC had annual revenues of \$8.3 billion for its fiscal year ended January 31, 2007.
