

SAIC Awarded ENCORE II Information Technology Solutions Contract From DISA

May 13, 2008

Company to Provide IT Services and Solutions to the Military Services, Department of Defense (DoD) and Other Agencies of the Federal Government

SAN DIEGO and MCLEAN, Va., May 13, 2008 /PRNewswire-FirstCall via COMTEX News Network/ -- Science Applications International Corporation (NYSE: SAI) today announced it has been awarded a contract from the Defense Information Systems Agency (DISA), Defense Information Technology Contracting Organization (DITCO) -- Scott Field Office, to provide global net-centric capabilities, attributes or services and IT solutions to the military services, DoD and other agencies of the Federal Government. The multiple-award, indefinite-delivery/indefinite-quantity contract has a five-year base period of performance, five one-year options and a contract ceiling value of \$12.225 billion if all options are exercised. Work will be performed throughout the United States and internationally as required.

The contract will support DoD's transformation to a network-centric environment which seeks to improve situational awareness by enhancing how the military services share information. Under the contract, SAIC will support command, control, communications, computers, intelligence, surveillance and reconnaissance areas, in addition to all elements of the Global Information Grid. SAIC will deliver a broad range of information technology (IT) services and solutions including enterprise policy and planning, network engineering, integrated solutions management, security engineering certification and accreditation, custom application development, and analytical support for implementing IT solutions.

"The ENCORE II contract is a critical contract award that enables SAIC to build upon relationships with DISA and the many DoD and federal agencies," said Deb Alderson, SAIC group president. "We look forward to providing quality IT solutions to these important customers that encompass a range of capabilities from legacy systems to new, emerging net-centric technologies."

About SAIC

SAIC is a FORTUNE 500(R) scientific, engineering, and technology applications company that uses its deep domain knowledge to solve problems of vital importance to the nation and the world, in national security, energy and the environment, critical infrastructure, and health. The company's approximately 44,000 employees serve customers in the Department of Defense, the intelligence community, the U.S. Department of Homeland Security, other U.S. Government civil agencies and selected commercial markets. SAIC had annual revenues of \$8.9 billion for its fiscal year ended January 31, 2008. For more information, visit www.saic.com.
