

Leidos secures \$191 million Army mission software modernization contract

August 13, 2024

RESTON, Va., Aug. 13, 2024 /PRNewswire/ -- [Leidos](#) (NYSE: LDOS), a Fortune 500® innovation leader, was recently awarded a \$191 million contract by the Army Contracting Command – Aberdeen Proving Ground for integrated lifecycle software and management solutions in support of the U.S. Army Communications Electronics Command, Software Engineering Center, C3T Directorate, Fires Division.

The contract covers a five-year performance period, with a six-month extension option. The safety-critical work Leidos will perform builds upon its prior mission software development for this customer, including by providing cyber-hardened software and systems engineering, technical services and software integration.

"For the U.S. Army to deliver precise, longer-range fires to counter continuous innovation from near-peer threats, they need software systems capable of incremental modernization," said Roy Stevens, Leidos National Security Sector President. "Applying our expertise in DevSecOps, we will sustain and upgrade fires systems and integrate third-party applications supporting the vision for the Army of 2030 and beyond."

More than seven mission software systems will be supported, including the Advanced Field Artillery Tactical Data System (AFATDS), Joint Automated Deep Operations Coordination System (JADOCS), and AN/TPQ-53 Multi-Mission Radar.

About Leidos

Leidos is a Fortune 500® innovation company rapidly addressing the world's most vexing challenges in national security and health. The company's global workforce of 48,000 collaborates to create smarter technology solutions for customers in heavily regulated industries.
