Leidos to advance IT efficiency, security and mission effectiveness for Defense Threat Reduction Agency

May 5, 2025

RESTON, Va., May 5, 2025 /PRNewswire/ -- Leidos (NYSE:LDOS) will modernize and operate information technology systems for the Defense Threat Reduction Agency (DTRA) enterprise that will help the agency deter, prevent and prevail against emerging threats around the world. As part of this IT transformation, Leidos will support DTRA's advance toward a Zero Trust cybersecurity posture.

Through a recently awarded $205 million contract, Leidos will use artificial intelligence technologies to accelerate DTRA's progress toward more automated and efficient operations. Also, Leidos will work to strengthen the DTRA network environment with a resilient, secure, hybrid cloud architecture.

"This work expands our long-standing relationship with DTRA and will help raise the bar for our support of their essential mission capabilities," said Bryan Jolly, Leidos senior vice president, digital modernization sector. "Leidos will seek to empower DTRA with data-driven operations, designed to create a modern, secure and efficient enterprise."

The five-year DTRA Integrated Information Technology Support Services (I3TS) award expands the company's work within the Department of Defense's "Fourth Estate," which includes agencies and activities that deliver essential support to military operations. It creates opportunities for Leidos to insert proven innovation and repeatable solutions at speed and scale throughout the department.

About Leidos
