Leidos continuing support for NASA flight hardware, logistics

November 17, 2026

RESTON, Va., Nov. 17, 2026 /PRNewswire/ -- NASA missions depend on flight hardware and critical equipment and supplies being where they're needed, when they're needed.

For more than two decades, and more than 200 launches, Leidos (NYSE: LDOS) has moved and integrated mission-essential cargo for NASA, including 423,000 pounds sent to the International Space Station and 143,000 pounds of returned cargo. Recently, it was one of 16 companies selected for the NASA Enterprise Logistics Support Services (NELSS) program, positioning it to extend its work at NASA centers and facilities.

Services may include:

- **Mission logistics:** Tracking, moving and supporting flight hardware, spaceflight equipment and ground support equipment.
- **Property and supply management:** Managing equipment, materials and supplies throughout their life cycle, while improving visibility into inventory and requirements.
- **Specialized logistics:** Meeting center-specific needs, including metrology, calibration and other specialized operations.
- **Transportation:** Managing mail, freight, fleets, multimodal transportation and transportation planning.

Leidos' perspective: "Effective logistics gives NASA the flexibility to make informed decisions as requirements change," said Debbie Wells, vice president of Exploration, Environment and Earth Intelligence at Leidos.

- "NELSS gives us the opportunity to continue connecting people, technology and data to turn information into actionable insights that help keep NASA missions moving at an accelerated pace."

Supporting logistics from supply to mission

Leidos brings expertise in logistics, digital technology, analytics and engineering to help customers streamline operations and adapt to rapidly evolving mission needs.

Through any future NELSS orders it receives, Leidos can apply its digital innovations and operational experience to help improve logistics at NASA centers.

NASA will compete individual orders among qualified NELSS companies over a five-year period that could be extended through three one-year options. The initiative carries a total estimated value of $1.4 billion across all awardees.

About Leidos

Leidos is an industry and technology leader serving government and commercial customers with smarter, more efficient digital and mission innovations. Headquartered in Reston, Virginia, with 50,000 global employees, Leidos reported annual revenues of approximately $17.2 billion for the fiscal year ended January 2, 2026.
